

Leopard Accounting System

Functional Requirements Documentation

1. Introduction

This document outlines the summarized functional requirements for the **Leopard Accounting System**, an integrated accounting and inventory management solution. The system provides businesses with robust tools to efficiently manage their financial transactions, inventory levels, vendor relationships, and related operations.

2. User Management

2.1. User Authentication

- Secure login system with email and password (or with Google)
- Role-based access control
- Password reset functionality

2.2. User Roles and Permissions

- Define and manage different user roles (e.g., admin, moderator, customer)
 - Admins can customize permissions for moderators
 - Ability to create, modify, and delete user accounts
-

3. Vendor Management

3.1. Vendor Database

- Create, Read, Update, and Delete (CRUD) vendor information
- Store comprehensive vendor details (e.g., name, contact information)

3.2. Vendor Performance Tracking

- Record and analyze order history
 - Vendor scorecards and performance reports
-

4. Inventory Management

4.1. Product Management

- Create, edit, and delete product information
- Set up product variants (size, color, etc.)
- Generate and manage unique barcodes for each product
- Barcode printing functionality
- Product categorization and tagging
- Product images and attachments
- Manual or automatic determination of product costing (e.g., Moving Average, Last Purchase)

4.2. Purchase Orders

- Create and manage purchase orders

- Generate unique barcodes for each purchase order invoice
- Allocate inventory to orders
- Partial receiving, backordering, and partial payment (specifying the payment methods)
- Update stock levels automatically upon receipt

4.3. Sales Orders

- Create and manage sales orders
- Generate unique barcodes for each sales order invoice
- Allocate inventory to orders
- Partial sending and backordering, and partial payment (specifying the payment methods)
- Update stock levels automatically upon shipment

4.4. Warehouse Management

- Support for multiple locations
- Cycle counting and physical inventory management

4.5. Product Movement

- Track and manage product transfers between different inventory locations
- Record reasons for transfers (e.g., reallocation, quality control)
- Generate transfer documents with barcodes
- Update inventory levels in source and destination locations automatically

5. Expense Management

5.1. Expense Tracking

- Create and categorize expenses
- Generate expense reports

6. Cash Management

6.1. Cash Overview

- **Real-Time Tracking:** Track available cash across bank accounts, Paymob accounts, and physical cash.
- **By Inventory:** View cash for each location and payment method.

6.2. Bank Account

- **Balances & Transfers:** Monitor bank balances and transfer funds between accounts.

6.3. Paymob Account

- **Balance & Transfers:** Track Paymob balances and manage transfers between Paymob, bank, or cash.

6.4. Cash on Hand

- **Cash Tracking:** Monitor physical cash balances by location and manage deposits/withdrawals.

6.5. Money Transfers

- **Internal & Inter-Inventory:** Transfer funds between accounts or across inventory locations.

7. Reporting and Analytics

7.1. Home Dashboard

- **Overview:** The system will provide a general home dashboard to display quick analytics and key performance indicators (KPIs) from different parts of the system, including sales, inventory, purchasing, and financials.

7.2. Sales Reports

- **Sales by Product Summary:** High-level summary of sales by each product.
- **Sales by Product Details:** Detailed sales data per product.
- **Sales Order Summary:** Overview of sales orders.
- **Sales Order Profit Report:** Analysis of profit margins on sales orders.
- **Sales Order Operational Report:** Operational details related to sales orders.
- **Sales Tax Report:** Overview of sales taxes collected.
- **Sales Returns:** Report on returned products from sales orders.
- **Customer Payment Summary:** Summary of customer payments.
- **Customer Payment by Order:** Detailed customer payment information for each order.
- **Customer Payment Details:** Breakdown of individual customer payments.
- **Customer Order History:** A historical log of all customer orders.
- **Product Customer Report:** Report on which products were purchased by specific customers.
- **Back Order Report:** Report on sales orders that have been partially fulfilled with pending items.
- **Sales Representative Report:** Performance analysis of sales representatives.
- **Customer List:** List of customers in the system.

7.3. Purchasing Reports

- **Purchase Order Summary:** Summary of purchase orders.
- **Purchase Order Details:** Detailed data on each purchase order.
- **Purchase Order Status:** Status of purchase orders (fulfilled, pending, etc.).
- **Vendor Payment Details:** Payments made to vendors.
- **Purchasing Tax Report:** Overview of taxes related to purchases.
- **Vendor Product List:** Products supplied by each vendor.
- **Vendor List:** List of vendors in the system.

7.4. Inventory Reports

- **Inventory Summary:** Overview of current inventory levels.
- **Inventory Details Report:** Detailed information on all inventory items.
- **Inventory by Location:** Inventory levels by specific warehouse or store locations.
- **Inventory Movement Summary:** Overview of inventory transfers and movements.
- **Inventory Movement Details:** Detailed data on specific inventory transfers and adjustments.
- **Product Price List:** List of product prices.
- **Stock Count Report:** Report on physical stock counts.
- **Product Cost Report:** Detailed costing for products.
- **Stock Transfer Report:** Record of stock transfers between locations.

7.5. Expense Reports

- **Expense Summary Report:** Overview of all recorded expenses.
 - **Expense Details Report:** Breakdown of individual expense entries.
 - **Categorized Expense Report:** Analysis of expenses by category (e.g., rent, utilities, etc.).
 - **Expense Approval Report:** Status of expense approvals and rejections.
 - **Reimbursement Tracking Report:** Overview of expenses that require reimbursement.
 - **Receipt Attachment Report:** Report of expenses with attached receipts (option to use OCR).
 - **Expense Trends:** Track expense trends over time for cost management.
-

8. Integration and Data Management

8.1. Accounting and Inventory Integration

- Seamless integration between accounting and inventory modules

8.2. Data Import/Export

- Bulk import functionality for products, customers, vendors, and transactions
 - Data export in various formats (CSV, Excel)
-

9. General System Requirements

9.1. User Interface

- Intuitive and responsive web-based interface
- Mobile compatibility for core functions

9.2. Performance

- Fast response times for data retrieval and report generation
- Ability to handle large volumes of transactions and inventory items
- Scalability to accommodate business growth

9.3. Localization

- Multi-language support
- Adaptability to local tax regulations and accounting standards
